

Mushroom

Muchomorek

Materials needed:

- Red and white paper (green optional)
- Glue
- Scissors
- Cotton balls
- Blown out egg shell (optional)

Use red paper to cut out pattern A. Decorate it with circles cut out of white paper (a hole punch works very well for this). Apply glue to shaded area and glue to opposite edge to form a cone. Cut pattern B out of white paper and glue or color green grass along one side. Roll into a tube along the long side and paste together along shaded area. Fill the tube with cotton balls, allowing some to protrude on top and bottom. Paste non-grassy end on the inside of the middle of the red cone.

For a more advanced design, make the cone as above and use a blown-out egg shell as the foot of the mushroom instead of a paper tube. (For instructions on blowing out an egg shell, see the Eggshell Pitcher page.)
